ACKNOWLEDGEMENT

This study is sponsored by Citizens for Educational Excellence. Research work is conducted in partnership with the Education and Workforce Committee of the United Corpus Christi Chamber of Commerce and the City of Corpus Christi Education/Workforce Stakeholders Committee. We appreciate the collaborative work with Dr. Janet Cunningham, Executive Director of Citizens for Education Excellence; and Dr. Gilda Ramirez, Vice President for Small Business and Education, United Corpus Christi Chamber of Commerce.

SUMMARY

This report provides an overview of education in the city of Corpus Christi, particularly the public school system. The objective is to provide background data and quantitative findings that help community stakeholders meet the educational and workforce needs of this South Texas region.

- Six independent school districts make up the K-12 public education system of Corpus Christi. Hispanics—the majority of the local overall population—make up 73% of this student body. They are more concentrated in West Oso and Corpus Christi ISDs, where student academic performance is relatively lower, according to STAAR results.
- Whites and Asians tend to be better performers in statewide standardized STAAR tests. Conversely, Economically Disadvantaged and At Risk students are more likely to fail these tests. However, Hispanic students in London ISD—the leading district in academic performance—tend to do even better than their White counterparts elsewhere in the city,
- Student performance disparities across ISDs and measures of socioeconomic status are consistent among different subjects and different grade levels. Such findings imply that a young child who scores well in any subject, such as Reading, is more likely to live in an affluent neighborhood and to succeed through high school and beyond, and vice versa.
- Differences in standardized test results across ISDs are directly related to differences in attendance and dropout rates. However, the relative ratings of college and career readiness for students as well as college admission test results seem to differ from the STAAR results.
- About 30% of first-time-in-college freshmen at Corpus Christi's two public higher education institutions are local high school graduates. The retention and graduation rates of these two institutions are relatively low, due in part to students who require developmental course work.
- Low graduation rates at the area's postsecondary institutions explain the relatively low educational attainment levels among residents in Corpus Christi in comparison with the rest of the nation.
- The area's postsecondary education system is deficient in meeting the workforce needs in occupations with the largest numbers of openings.

1. Introduction

This report provides an overview of K-16 education in the city of Corpus Christi. The objective is to provide background data and quantitative findings that help community stakeholders meet the educational and workforce needs of this South Texas region. The contribution of education to regional workforce and economic development is indisputable. As such, a better understanding of student performance in the local education system is key to the design of strategic plans that aim at enhancing the workforce quality and thus economic competitiveness of the region.

The focus of this report is students' academic performance in Corpus Christi's public school system. Public education has a significant impact on local residents' educational attainment and skill levels. Annual Academic Performance Reports of the Texas Education Agency (TEA) are the primary sources of elementary and secondary school data. Data on post-secondary education are obtained from individual schools and the Texas Higher Education Coordinating Board (THECB). This report concludes with a comparison of postsecondary program completions against job demands in the region.

2. K-12 Public Education

The city of Corpus Christi consists of six Independent School Districts (ISDs): Calallen ISD, Corpus Christi ISD, Flour Bluff ISD, London ISD, Tuloso-Midway ISD, and West Oso ISD. Today, the total student enrollment among public schools in these school districts is roughly 45,000. The numbers of students in the area are quite evenly distributed across the 12 school grade levels, except a reduction of 457 students in Grade 11 and 490 students in Grade 12 from the lower grades.

With 58 schools, Corpus Christi is the largest ISD by student population, making up 70% of students enrolled in the area. With slightly more than 800 students, London ISD is the smallest, accounting for approximately 2% of the city's student population.

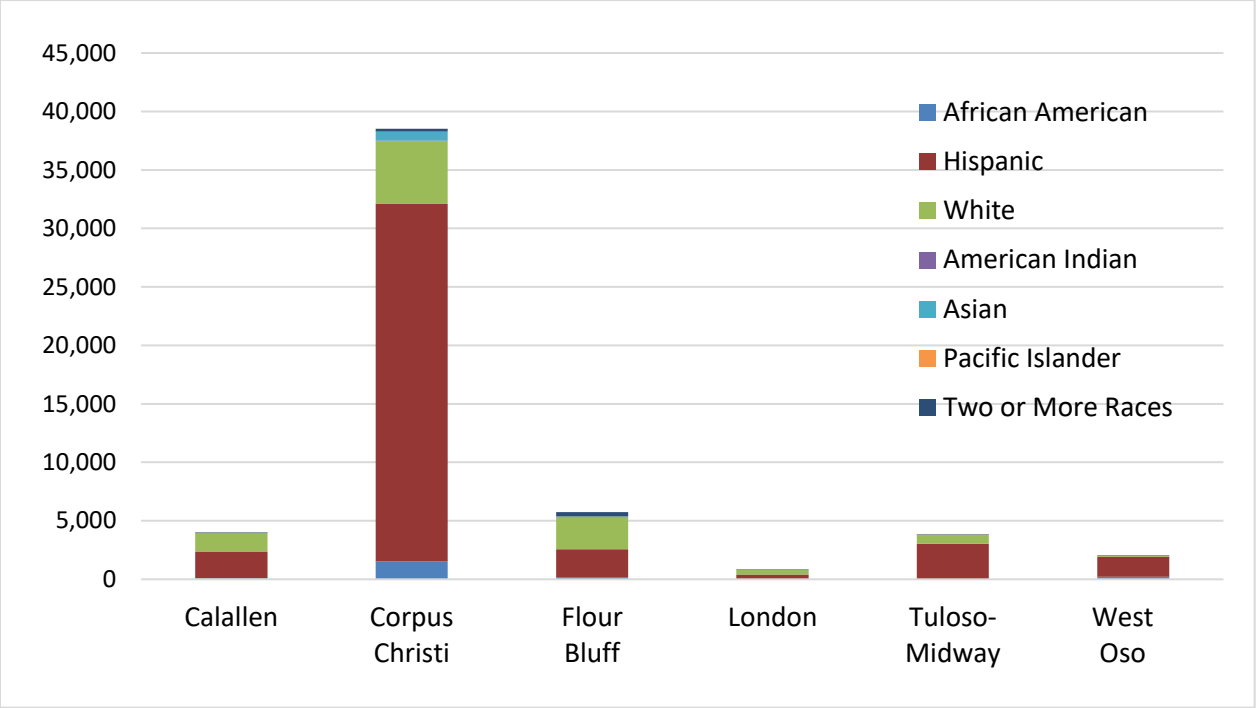
2.1 Student Demographics

Reflecting the breakdowns of the local overall population, Hispanics make up nearly three-quarters (73%) of the student population in the city of Corpus Christi. This demographic group is relatively more concentrated in West Oso ISD (86%) and Corpus Christi ISD (79%) than in Flour Bluff ISD (41%) and London ISD (47%). Non-Hispanic Whites together make up 20% of the student population. They are relatively more concentrated in Flour Bluff and London ISDs (47%). Only 53 students (3%) in West Oso ISD are White.

The third largest ethnic/race group is African American, or Black. African American students make up 4% of the area's student population. As for Hispanics, they are mostly concentrated in West Oso ISD (86%). Asians make up roughly 2% of the area's student population. More than 80% of Asian students in the city enroll in Corpus Christi ISD, followed by Flour Bluff ISD (84 students).

Across the six school districts, 57% of the student population obtains the Economically Disadvantaged (ED) status. These students are highly concentrated in certain schools. The share of this socioeconomic group ranges from 92% in West Oso ISD to 9.4% in London ISD.

Student Demographics by ISD



Similar to the ED group, slightly more than half (52%) of the area student population is classified as At Risk (AR). The shares of At Risk students across the area's ISDs are correlated with the shares of Economically Disadvantaged students, ranging from a low of 15.6% in London ISD to a high of 61.2% in West Oso ISD.

2.2 Graduates

A total of 2,289 students graduated from Corpus Christi in 2015-2016. Hispanics made up nearly 80% of the total graduates. Whites made up another 13%, and African Americans 5%.

Compared with the Texas statewide average, relatively fewer students (58% vs. 75%) in the area graduated from the Recommended High School program, whereas relatively more (15% vs. 3%) students graduated from the Foundation High School program. The share of local students graduated from the Minimum High School program was also relatively higher (18% vs. 14%). The share of local Special Education graduates at 8% was close to the state average.

2.3 K-12 Academic Performance

Performance of students in individuals ISDs is evaluated and compared under the State of Texas Assessments of Academic Readiness (STAAR) program, which began in 2012. The Texas Education Agency reports results of the annual standardized tests of students in Grade 3 and higher. In addition to individual end-of-course assessments, the subjects for assessments include Reading, Mathematics, Writing, Science, and Social Studies. The Appendix contains detailed data of the test results by ISD.

Performance disparities across ISDs are consistent across different subjects and over time since the STAAR program's inception in 2012. The overall performance results of individual ISDs are also quite similar across different grade levels. The following describes the key findings based on standardized assessment results of Academic Year (AY) 2015-2016.

The overall percentages of area students who pass the Reading or Mathematics tests are on par with the statewide averages. Improvements are evident at higher grade levels. For instance, 71% of third grade students in the area passed the Reading test in 2016, and 77% of them passed the Math test. For Grade 5, the percentages of students passing the test rose to 78% and 85%, respectively. The percentage of students passing the Reading test improved further to 82%, but the percentage of students passing the Math test dropped to 71%.

Compared with the overall student population, the percentages of Economically Disadvantaged students passing these standardized tests were about 5 percentage points lower. Among individual ISDs in the area, Calallen and London ISDs had the highest percentages of students who passed either the Reading or Math test, whereas West Oso ISD had the lowest percentage. For instance, slightly less than 90% of third grade students in Calallen and London ISDs passed the Reading or Math test in 2016. For West Oso ISD, only 54% of third grade students passed the Reading test and 71% of them passed the Math test.

Disparities in academic assessment results persist at higher grade levels. By the end of Grade 8, more than 94% of students in London and Calallen ISDs passed the Math test, whereas 64% of students in West Oso ISD passed the same test. The percentage of Corpus Christi ISD students passing the Math test was close to West Oso ISD's.

Snapshot of Standardized Assessment Results

	State	Area	ISD District					
	Texas	Corpus Christi	Calallen	Corpus Christi	Flour Bluff	London	Tuloso-Midway	West Oso

Source: Texas Education Agency, *Texas Academic Performance Report*, 2015-2016.

Academic performance varies remarkably across major ethnic/race groups. Asian students tend to score the highest in both Reading and Math tests, whereas African American students tend to score the lowest. More than 95% of Asians in any of the three testing grades pass either the Reading or Math test. By contrast, the percentage of African-American students passing either test is at least 5 percentage points below the area average.

Within a given ethnic/race group, the percentage of students passing the STAAR tests is typically higher in schools with overall better performance records and lower in schools with overall worse performance records. For instance, 96% of Hispanic Grade 8 students in London ISD—the district with overall best student performance records—passed the Math test in 2016. This share was even higher than the share of 91% for the White counterparts in the same district. In West Oso ISD—the district with overall poorest student performance records—the percentage of White students in Grade 8 passing the same Math test was 80%, which was higher than 69% for Hispanic students but still below the area-wide average of 83%.

The patterns of individual end-of-course assessment test results are similar to the broad subject test results at lower grade levels. In general, the percentages of students passing the end-of-course tests are comparable between the city of Corpus Christi and the statewide average. Locally, relatively more students pass these tests in London, Calallen, and Flour Bluff ISDs than in Corpus Christi and West Oso ISDs. While Hispanics across the area tend to perform worse than Whites in most tests, proportionally more Hispanic students in London ISD pass any of the tests than their White counterparts, except for Algebra. In London ISD, the shares Hispanic students who pass the end-of-course tests are between 95% and 100%.

The observed performance disparities across schools and demographic groups persist throughout most grade levels. This implies that, other things being equal, a young child who scores well in any subject, such as reading, is more likely to be a high achiever through high school and beyond. A child who fails an assessment test is more likely to drop out from school before entering college.

2.4 Attendance and Dropout Rates

The student attendance rate is 95% for all schools in the Corpus Christi area, compared with the state average of 96%. While variations across the six local ISDs and across different ethnic/race groups seem quite small, the patterns of attendance rates are directly related to the measures of student performance.

In particular, Asian students have an overall highest attendance rate of 97%, and Asians tend to have the highest chances of passing any STAAR test. On the contrary, the overall attendance rate among Economically Disadvantaged students is 94%. This group's slightly below average attendance rate is directly associated with its below average performance records.

As for attendance, the dropout rates appear to vary little across different ISDs and demographic groups. One exception is the 7% dropout rate among Grades 9 to 12 White students in West Oso ISD. This remarkably higher overall dropout rate is associated with a relatively low overall attendance rate of 90% for this group of students.

2.5 Graduation Rates

The overall 4-year graduation rate for local grade school at 89% is the same as the statewide average. The graduation rates of Corpus Christi and West Oso ISDs are slightly lower than the other ISDs. Asians and Whites are more likely to graduate than Hispanics and African Americans. Economically Disadvantaged students are much less likely to graduate: 15% of these students do not graduate within the 4-year window. This group of students also has the highest 4-year dropout rate at 11%, compared to the area average of 8%.

The patterns of the 6-year graduation and dropout rates across ISDs and demographic groups are similar to the patterns based on the 4-year window. One notable observation is the relatively higher share (4%) of Whites in Corpus Christi ISD earning a GED, along with a relatively high dropout rate (14%) of American Indians in the same ISD.

2.6 Advanced Course Completion

The proportion of Corpus Christi high-school students taking advanced or dual credit courses is comparable with that for the state as a whole. Half of eleventh and twelfth grade students (50%) in the city complete at least one advanced or dual credit course, compared with 55% for the state. The percentage of students who take any of these courses is the highest at 73% for London ISD. Pacific Islander (83%) and Asian (77%) students are also more likely to take an advanced/dual credit course than African American (35%) and Hispanic (48%) students. Economically Disadvantaged students are less likely (44%) to take these courses. In terms of subjects, relatively more students take advanced/dual credit courses

in Math and Social Studies than in Science and in English, Language, and Arts (ELA).

2.7 College/Career Readiness

In Texas, students are College Ready and/or Career Ready if they meet certain academic indicators or standardized testing benchmarks set by the Texas Higher Education Coordinating Board (THECB) and the Texas Education Agency (TEA). In general, College- and Career-Ready graduates should be able to enter and succeed in entry-level postsecondary courses with no need for remediation.

In the city of Corpus Christi, 30% of high-school students are College Ready graduates in both English for Liberal Arts (ELA) and Math. Relatively more students are rated as College Ready in ELA than in Math. London ISD has the highest percentage of students as College Ready Graduates, whereas West Oso ISD has the lowest. Only 13% of West Oso Grade 12 students are College Ready in both fields. Across different ethnic/race groups, Asians tend to be more College Ready in either ELA or Math. Conversely, only one in 10 (11%) African American students is College Ready in both fields. According to THECB, underprepared students are less likely to successfully complete developmental education courses and they are also less likely to succeed in college.

As for college readiness, the percentage of local students rated as Career Ready graduates at 66% is below the statewide average of 75%. In contrast to the rating for being College Ready alone (13%), 94% of West Oso graduates are rated as both College and Career Ready. American Indians (83%) and Asians (80%) in the area tend to be more likely to be College and Career Ready graduates, whereas almost all African American (95%) and Hispanic (94%) graduates specifically from West Oso are College and Career Ready.

Relatively fewer Corpus Christi area students take Advanced Placement (AP) courses than their counterparts in the state as a whole. Less than one in five (18%) high-school students across the six local ISDs takes at least one AP course. London ISD students are most likely to take an AP course, and no West Oso student takes any AP course. About half of Asian and Pacific Islander students pass at least one AP course.

2.8 College Admission Tests

The average SAT/ACT scores of students in the Corpus Christi area are on par with the statewide averages. The two school districts with relatively better STAAR test results, namely London and Calallen, also tend to have average SAT/ACT scores

about 10% higher than the area averages. On the contrary, SAT/ACT scores are typically lower for the ISDs with fewer high performing students, such as West Oso and Corpus Christi. However, the overall test performance of Tuloso-Midway and Flour Bluff ISDs, especially the ACT, is better than the leading district of London ISD.

Among the major ethnic/race groups, Asians perform the best in both standard college admission tests. Their ACT test scores are on average more than 30% higher than the area average scores. Whites on average also score about 15% higher than the area average. On the contrary, the average scores are about 10% lower among African Americans and 5% lower among Hispanics.

Although Economically Disadvantaged students tend to perform less well in SAT/ACT tests, their average scores are within 5% of the area-wide averages. The relatively narrow performance gaps especially in comparison with STAAR test results at lower grades are the results of exceptionally higher SAT/ACT test scores among students in Tuloso-Midway ISD.

In 2016, the proportion of high-school graduates attending Texas universities and colleges was 58% statewide. The ratio for Corpus Christi graduates was slightly lower at 54%, ranging from 38% for West Oso ISD to 63% for Calallen ISD. Proportionally more female (54%) than male high-school graduates entered college. Economically Disadvantaged graduates are less likely (40%) to attend college than other graduates (57%).

Among these local high school graduates, 68% completed the first year of college without remediation. This ratio is slightly below the ratio of 71% for the state as a whole. Whereas 84% of Flour Bluff graduates completed the freshman year without remediation, 63% of Corpus Christi ISD graduates did so.

2.9 Charter Schools

A number of charter schools operate in Corpus Christi. In Texas, charter schools operate under the TEA and receive academic accountability ratings as other public schools. The major charter schools in the city are Corpus Christi Montessori School and Seashore Charter Schools. Corpus Christi Montessori School had with a total of 168 Grades 1-8 students in 2016. The Seashore Charter Schools district on North Padre Island had 254 K-4 students in its Seashore Learning Center and 222 Grades 5-8 students in its Seashore Middle Academy.

In 2016, 65% of students in Corpus Christi Montessori School met the STAAR Level II Satisfactory Standard, compared to 75% statewide. The average passing rate for Hispanic students at 60% was noticeably lower than the 76% rate for non-Hispanic

white students. Economically Disadvantaged children made up nearly 20% of the student body, and those students' average passing rate was 49%.

For Seashore Charter Schools, the corresponding average passing rate was remarkably better at 90%. With an average passing rate of 94%, Hispanic students perform better than non-Hispanic white students. The overall better performance records of students in both its Seashore Learning Center and Seashore Middle Academy were associated with the fact that less than 2% of the student body belong to the Economically Disadvantaged group.

Corpus Christi Charter Schools' Performance, 2016

	Demographics					
	Campus	Hispanic	White	Asian	Special Ed	Econ Disadv
STAAR Percent at Level II Satisfactory Standard (%), All Grades, All Subjects						
Corpus Christi Montessori School	65	60	76	62	21	49
Seashore Learning Center	87	94	87	NA	63	NA
Seashore Middle Academy	92	93	91	100	38	89

Source: Texas Education Agency, *Texas Academic Performance Report*, 2015-2016.

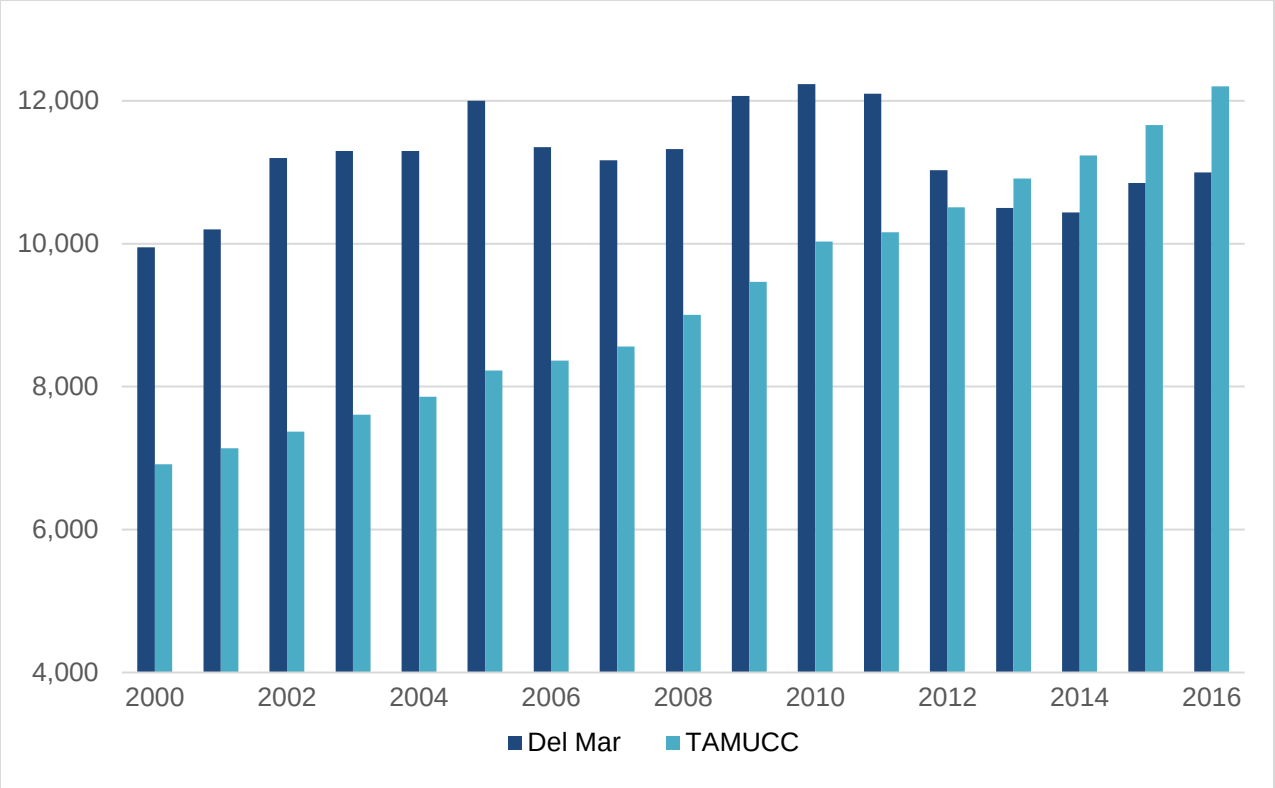
3. Postsecondary Education

Texas A&M University-Corpus Christi (TAMUCC) and Del Mar College (DMC) are the two public postsecondary education institutions in Corpus Christi. TAMUCC is now a four-year university that also offers Master's and doctoral degree programs. Del Mar is a two-year community college that has provided postsecondary education particularly for Corpus Christi residents since 1935.

In 2016, enrollments at these two institutions totaled roughly 22,000. The headcount at TAMUCC has grown steadily since its introduction of lower-division curriculum in 1994. During that period, however, Del Mar College's headcount enrollment fluctuated along with changes in regional economic conditions and other regional factors. Total enrollment at TAMUCC began to exceed DMC's in 2013. Today, the headcount is roughly 12,000 at TAMUCC and 11,000 at DMC.

The Craft Training Center (CTC) of the Coastal Bend also offers postsecondary training program. In 2016, the enrollment at the CTC was 1,026, and it offered electrical and welding programs for 317 students in local high schools.

Student Enrollments at Local Higher Learning Institutions



3.1 Student Demographics

The ethnic/race breakdowns of the student body are quite similar between TAMUCC and DMC. As part of the national trend, female students are the majority (60%) at either institution. Today, non-White Hispanic students represent the largest ethnic/race group at either institution (46% for TAMUCC and 65% at Del Mar). The proportions of Hispanic students have also been increasing over the past decade. Non-Hispanic Whites make up the second largest ethnic/race group in either institution, and their share of the overall student enrollment has been dropping at a much faster rate at TAMUCC than Del Mar. Before 2008, more than half of the student population at TAMUCC was White.

Students' residence differs remarkably between the two institutions. At Del Mar College, nearly 90% of its students come from the three counties of the Corpus Christi metro area, and roughly 80% of them pay in-district tuition. For TAMUCC, the share of students from this metro area declined from 54% in 2007 to 37% in 2016. This steady decline corresponded to the persistent increase in the collective share of students from other parts of Texas, which was 56% in 2016 compared to 42% in 2007. The share of students from other countries also increased from 2% to 4% over the same period. For Del Mar College, international students have historically made up about 1% of its student body.

In 2016, roughly 2,000 students at TAMUCC were first-time-in-college (FTIC) freshmen. Slightly more than four in five (82%) of these freshmen were also first-generation college students, substantially higher than the national average of roughly 50%. About 60% of full-time undergraduates received need-based financial aid and the average need-based scholarship or grant award was $6,060, compared to $9,106 for in-state tuition and fees. Nearly 43% of these students received Pell Grant, compared to the statewide average of 40%.

In 2016, about 1,200 Del Mar College students were first-time freshmen. About 1,000 of these incoming students (83%) graduated from a high school within the city of Corpus Christi. Slightly more than 40% of full-time students received need-based financial aid, and 35% of them received Pell Grant aid. The average grant or scholarship award was $4,430, compared to the in-state tuition and fees that totaled $3,820.

3.2 Graduation Rates

In AY 2016-2017, the 6-year graduation rate for the 2010 cohort in Del Mar College was 25.3%, compared with the average of 32.2% for Texas community colleges. The graduation rates of more recent cohorts were correspondingly smaller. The

average time to obtain an associate degree was 5 years, compared with the state average of 4.4 years. Among those first-time freshman students, 73% were placed as requiring developmental coursework in one or more subjects. The graduation rate of these students was 11.5%, which was below the 27.3% graduation rate of other students. In addition to graduates, 14% of DMC students transferred to a 4-year institution. Among those who graduated or transferred, nearly half of them (49%) entered TAMUCC.

For TAMCC, the 6-year graduation rate was 43.3% for the Fall 2010 FTIC cohort, compared with the 59.3% Texas average. The corresponding 4-year graduation rate was 20.4%, compared with the 31.2% statewide average. The average time to graduate was 5.1 years, compared with 4.9 years statewide. The share of graduates who found employment or enrolled in graduate school was 79%, which was slightly higher the statewide average of 78%.

The 6-year graduation rate of TAMUCC students who had enrolled in Developmental Education courses was much lower at 25.6%, compared with 41.9% for those who did not require Developmental Education. International students had the highest graduation rate at 67%. Among the major ethnic/race groups, Asians had the highest graduation rate at 51.9%, followed by 43.5% for Whites.

Out of those TAMUCC students who did not graduate, 43% had transferred to another higher education institution and the rest (20%) had dropped out altogether. This university's freshman retention rate was 56% in AY 2015-2016. This most recent retention rate was noticeably lower than the retention rate of 65% in AY 2009-2010. The persistence rate, which also includes students who transfer to another school, was slightly higher at 59.1%.

4. Educational Attainment

4.1 College Degree Attainment

Academic performance of students in Corpus Christi's public education system affects the area's overall educational attainment and workforce skills. According to the latest (2015) Census data, the share of the local adult population (25 years and older) with a college degree is 28.4%, compared with 37.8% nationwide. The share of high school graduates in Corpus Christi, however, is on par with the national average at roughly 28%. This implies an educational gap specifically at the postsecondary rather than grade school level.

Educational Attainment

Population 25 years and over	U.S.	Corpus Christi City
Less than 9th grade	5.7%	7.9%
9th to 12th grade, no diploma	7.6%	10.6%
High school graduate (includes equivalency)	27.8%	28.0%
College certificate, no degree	12.7%	15.0%
Associate's degree	8.1%	7.5%
Bachelor's degree	18.5%	13.4%
Graduate or professional degree	11.2%	7.5%

Source: American Community Survey 5-Year Estimates, 2015.

4.2 Postsecondary Education Completions

Program Completions by Award Level, 2015

Award Level	Completions	Percent
Award of less than 1 academic year	426	9.9%
Award of at least 1 but less than 2 academic years	829	19.2%
Associates degree	1,022	23.7%
Bachelor's degree	1,486	34.5%
Master's degree	516	12.0%
Doctors degree	31	0.7%

Source: EMSI.

In 2015, a total of 4,134 individuals in Corpus Christi completed postsecondary certificate or degree programs. The Appendix lists detailed data by program and institution. With more than 2,000 degree graduates, Texas A&M University-Corpus

Christi is the largest degree provider. Drawing from alumni surveys, about 30% of its new graduates are employed within the Coastal Bend region.

Program Completions by Institution, 2015

Institution	Certificates	Degrees	Total Completions
Texas A&M University-Corpus Christi	0	2,033	2,033
Del Mar College	399	1,019	1,418
Brightwood College-Corpus Christi	303	3	306
Southern Careers Institute-Corpus Christi	183	0	183
Craft Training Center of the Coastal Bend	176	0	176
South Texas Vocational Technical Institute	170	0	170
South Texas Barber College	24	0	24

Source: EMSI.

In addition to degree programs at TAMUCC and Del Mar College, Brightwood College, Southern Careers Institute, South Texas Vocational Technical Institute, and the Craft Training Center of the Coastal Bend provide postsecondary education and training. The majority of these non-degree programs provide certificates upon completion. The Appendix lists annual program completions and job openings by occupation.

Measured by average annual openings, the most popular occupations in Corpus Christi are truck drivers (210 openings), followed by registered nurses (126 openings), operations managers (120 openings), civil engineers (100 openings), postsecondary teachers (75), and teacher assistant (68). The supply side of the regional workforce depends on individuals who complete skill training programs. Judging by annual program completions, the leading occupations are registered nurses (395 completions), medical assistants (376 completions), sales managers (345 completions), cost estimators (344 completions), and postsecondary teachers (314 completions).

Differences between annual openings and completions represent deficits of the local education and training system in meeting local workforce needs. The gap in meeting local workforce needs is typically higher for occupations with the most job openings, namely truck drivers (1,578), civil engineers (830), registered nurses (768), teacher assistants (651), and operations managers (650).

2011-2012 Graduates reenrolled at Del Mar College, Fall 2012	35	75					

Source: The Texas Higher Education Coordinating Board, On-demand Student Tracking System. The tracking system matches the IDs of students who were enrolled at Del Mar College during the fall of 2013, spring 2014, or summer 2014 semesters and who did not reenroll in fall 2014, with the fall 2014 student enrollments reported by all Texas public higher education institutions. Graduates who earned more than one award during the academic year and then transferred are counted only once.

Source: Each semester, students entering Del Mar College who have no prior college experience are identified as that semester's first-time-in-college (FTIC) cohort. Transfer and graduation data from the Texas Higher Education Coordinating Board's statewide data system is merged with the cohort files.
This methodology of updating defined cohorts makes it possible to study the persistence and completion rates of groups of students over time. Dual credit students are counted as FTICs when and if they reenroll at Del Mar College following their high school graduation. Includes full- and part-time students.

THECB Developmental Education Accountability Measures

TEXAS A&M UNIVERSITY - CORPUS CHRISTI

Accountability Measure: The percent of prepared and underprepared students who successfully complete a college-level course in math, reading and writing.	Fall 2015 Cohort - tracked for 1 year			
	(a)	(b)	(c)	(d)
	Total/Area Counts	Received credit pre-matriculation	College level course completion (grade A, B, or C)	College level course completion (grade A, B, or C) including pre-matriculation credit (percent of total) (b+c)/(a)
Summary Data				
Number of FTIC students	2,345			
Met state standards in all areas	1,834			
Did not meet state standards in one, two, or all three areas	456			
Unknown[1]	55			
Data by Subject Area				
Met Standard[2]				
Math	1,859	213	327	29%
Reading	2,221	474	226	31.5%
Writing	2,216	426	1,239	75.1%
Did Not Meet Standard				
Math	431	N/A	47	10.9%
Reading	70	N/A	20	28.6%
Writing	74	N/A	24	32.4%
Unknown[3]				
Math	55	N/A	4	7.3%
Reading	54	N/A	3	5.6%
Writing	55	N/A	10	18.2%
Data Highlight: Most and Least-Prepared Populations				
Met Standard in All Three Areas				
Math	1,834	213	324	29.3%
Reading	1,834	349	203	30.1%
Writing	1,834	325	1,033	74%
Did Not Meet Standard In All Three Areas				
Math	38	N/A	2	5.3%
Reading	38	N/A	10	26.3%
Writing	38	N/A	13	34.2%

[1]The unknown summary total includes students who are unknown in all areas or unknown in some areas and met in others. Students who are unknown in some areas and NOT met in others are included in the "Did not meet state standards in one, two, or all three areas" category.

[2]Students who met state standards upon entry are given only one year to pass a first college-level course in the related accountability measure; however, this report includes three years of college-level course completion data for students who met the standard.

[3]Unknowns by area include students with waivers or military exemptions who have not been reported as meeting TSI on a performance measure for that area.

DEL MAR COLLEGE

Accountability Measure: The percent of prepared and underprepared students who successfully complete a college-level course in math, reading and writing.	Fall 2015 Cohort - tracked for 1 year			
	(a)	(b)	(c)	(d)
