College of Nursing and Health Sciences’ Military eLine Program Offers College Credit Based on Medical Experience in the Field
Registration for fall semester runs from Wednesday, June 1, through Monday, Aug. 1

CORPUS CHRISTI, Texas – Registration for the new eLine Military program (ELM) being offered by the College of Nursing and Health Sciences at Texas A&M University-Corpus Christi begins Wednesday, June 1, and will run through Monday, Aug. 1.

The ELM program allows Texas residents who are serving in the military or who are veterans to receive college credit based on medical experience in the field. Available entirely online, the program gives participants access to distance learning technologies to earn a bachelor's of nursing degree, be eligible to take the NCLEX, become a registered nurse and enter the health care workforce.

“The ELM program will increase access to quality health care in Texas by developing a qualified, culturally competent health workforce and strengthening and expanding the nursing workforce,” said Dr. Mary Jane Hamilton, dean of the College of Nursing and Health Sciences. “And unlike many other programs, ELM will employ a program coordinator who will provide the key support, guidance and expertise to students so that they may access other mainstream resources.”

The ELM program is modular, articulated, and competency based, allowing military personnel to seamlessly process through the program without repeating prior content. According to Hamilton, the program coordinator will be in continual contact with the participant to provide support and a wide variety of activities that will enhance ultimate academic success.
