National Science Foundation Grant Provides Financial Assistance for Incoming Freshmen at Texas A&M University-Corpus Christi
Deadline to apply for Computer Science and Mathematics Scholarships is April 1

CORPUS CHRISTI, Texas – A grant from the National Science Foundation (NSF) is providing scholarships for incoming freshmen at Texas A&M University-Corpus Christi who are committed to a career in computer science and mathematics.

The deadline to apply for the “Attacking the Gathering Storm in Computer Science and Mathematics” (STORM) scholarships, which are part of the University’s Scholarships in Science, Technology, Engineering and Mathematics (S-STEM) program, is Thursday, April 1. Selected students will receive $5,000 per academic year with a maximum total of $15,000. In addition they will receive a free laptop computer and priority consideration for undergraduate research fellowships.

STORM scholars are also eligible for faculty and peer mentoring, academic advising and assistance, career services and counseling, and professional development activities. To be eligible for the STORM scholarship, applicants must be an incoming freshman and a United States citizen or permanent U.S. resident. They must also be committed to pursuing a degree in computer science or mathematics at Texas A&M-Corpus Christi and be able to demonstrate financial need.

For more information, contact Lori Vela at 361.825.2479. To complete an application online, go to http://storm.tamucc.edu.
