Title of Book: **Pete the Cat's Got Class**
Author: **James Dean**
Publisher/Year: **Harper Collins Publishers/ 2016**
ISBN: **978-0-06-230410-0**

Grade Levels for Recommended Use: 1st Grade

TEKS:
(3) Number and operations. The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems. The student is expected to:

(E) explain strategies used to solve addition and subtraction problems up to 20 using spoken words, objects, pictorial models, and number sentences; and

Brief Summary:
This book shows how Pete the cat can make learning math fun, by showing other students to solve addition/subtraction math problems interactively using objects to solve the problems.

Materials needed:
- The Book
- Paper
- Pencil
- Counters
- Number flash cards

Suggested Activity:
The teacher will begin the lesson by asking students what they know about addition/subtraction. She then will introduce the book to them and discuss what they will be learning today. She will then begin to read the book; the book provides some adding/subtraction problems that we will work through as we read the book. The students will have counters, paper, and a pencil. When the book presents a math problem the students will then write the problem on their paper and using their counters they will come up with an answer. We will then check the answer as we keep reading the story as a class.
