

The Texas A&M University-Corpus Christi (TAMU-CC) Coastal Bend Midstream Program (CBMP) and the Midstream America Scholarship Fund (MASF) are pleased to announce CBMP's 2025 MASF recipients. Scholarships of \$2,000, funded by MASF, were awarded by CBMP to two exceptional students in the College of Engineering and Computer Science. The winning students were selected by their departments based primarily on their outstanding academic achievements and reputation. The recipients of the scholarships are:

**Ellie Bell**  
BS - Cyber Security

**Jesse Long**  
BS – Civil Engineering

Thomas Kalb, Director of CBMP, commented, "We are truly honored by MASF's generous support of our students and our university. CBMP's mission is to build the value proposition and partnership between TAMU-CC, its faculty and students, and the midstream industry through research, education, and knowledge transfer. MASF is extremely important in helping us accomplish this mission."

Michael Johnston, MASF President, said, "The Midstream America Scholarship Fund is committed to STEM professionals, enabling them to focus on their studies and prepare to enter the industry without facing significant burdens at the start of their careers. This meaningful endeavor aims to inspire individuals like Ellie and Jesse to pay it forward once they have established stable jobs in their community."

The Midstream America Scholarship Fund was created and funded by the San Antonio Pipeliners Association to support and attract potential future leaders of the midstream industry.
