BATCH HEADER CODES

Accounting entries posted into the FAMIS system are batched by type prior to data entry. The batch name, otherwise known as the header code, consists of a 6 digit alpha-numeric reference code.

Accounting batches consist of batch headers manually assigned by Accounting Services or automatically assigned by FAMIS Services. The following provides a brief description of how batch header codes are assigned.

Accounting Services Batches

When looking at the batch header code of a batch processed and entered manually by Accounting Services, the first two letters of the code refer to the type of accounting entry being posted. The third and fourth digits represent the month the entry is being posted into in FAMIS. The remaining two digits are numbered sequentially identifying the number of the batch. The following chart shows an example of types of entries, and the numbering sequence used to reference them. The chart assumes the posting month is September and that each batch is the first batch of its type for the month.

BATCH HEADER CODES

TYPE	MONTH	STARTING ENTRY # EACH MONTH	EXAMPLE
JE (Journal Entry)	09	01	JE0901
EJ (Journal Entry)	09	01	EJ0901

CB (Contract Batches)	09	01	CB0901
CRT*(CircuiTree Cash Receipt)	N/A	N/A	N/A
JET*(CircuiTree Journal Entry)	N/A	N/A	N/A

*A CircuiTree batch consists of two entries: a cash receipt(CRT) and a journal entry(JET). The numbers for each batch will correlate. For example,CRT112 will correlate with JET112.

Each entry in a batch is given a unique 7 digit entry number. This number is given based on the month of the year and the type of entry being made. The chart below gives examples of how entries are numbered.

	Entry Number Reference		
MONTH (Assume September)	TYPE	STARTING ENTRY # EACH MONTH	EXAMPLE
09	J (Journal entry)	0001	09J0001

09	B (Budget)	0001	09B0001
09	G (Beginning Balance)	0001	09G0001

Accounting Services also submits entries to FAMIS electronically from various systems like Banner and General Receipts. Banner batches will have a reference beginning with either CRB or BNR. General receipts (the system used at the Business Office) will have a reference beginning with CR.

During Month 13 (the extra month that Accounting Services uses to close out the year) the prefixes "AFR" or "PC" are used for most batches. Batches with the prefix of AFR reverse out in the next fiscal year with an RFR batch reference.
