What is a DBR and What does it do?

• DBR = Departmental Budget Request

• A DBR transfers Budget and/or funds within one or more accounts. This is initiated at the departmental level.

• FAMIS Embedded account attributes control the creation of most allowed transfers. This means that an account must be set up to allow for transfer of budget and/or funds.

• DBR’s allow for Electronic approvals and automatic posting which expedites the transfer process.

• Canopy assigns a unique number to the DBR, prefaced with DBR15U.
When to Use a DBR?

- To cover deficits
- To correct prior DBR’s
- To move funds between expense pools
- To set-up initial budgets
- To transfer funds
- To fund start-up accounts
- To make a permanent change
- Reminder - Do not use a DBR to correct the posting of an expense to the wrong account, use a Departmental Correction Request (DCR) instead.
How to Get Access to Complete a DBR

An email should be sent to famis.security@tamucc.edu by your supervisor requesting access to create a DBR. In addition, you will need to show proof of completing this course by emailing your transcript of course completion to FAMIS Security.
