Persons interested in geology should have a genuine interest in natural sciences, some inborn curiosity to figure “things” out, and, as in any technical profession, a good portion of perseverance and motivation. Many geologists like the outdoors, but a lot of geoscience is done in the lab, on the computer, on board of a ship, or using remotely operated tools such as satellites and the rovers on planet Mars. Because science is also about effective communication, it helps to have a certain talent for technical writing and public speaking. Tracks students can choose from include: General Geology, Geochemistry, Environmental Geology, Energy Resources.
