RELATED EXPERIENCE

Larsen & Turbo Technology Services Limited

Morris, IL

Senior Project Manager

October 2022 – Present

- Managed capital initiatives ranging from \$100K USD to multi-million USD for global execution in process improvement and MOC projects
- Established and maintained strong business relationships by defining project scopes, schedules and gathering customer requirements to ensure accurate estimation for engineering for multiple concurrent projects
- Tracked & managed program cost, schedule & resources on execution of projects.
- Defined & evaluate KPIs derived from program milestones, estimates, and spending forecasts leading to all projects in the Program to an on-time & on-budget finish with 80-90% completing early.
- Collaborate with cross-functional teams on design and implementation of new initiatives, overseeing compliance from feasibility to project execution; guide team of 30+ through weekly reviews to synchronize plans and performance
- Direct key cost-management processes and value engineering to provide more options to customer for lowering the cost of the Program.
- Coordinate with functional managers, external suppliers and/or other resources to develop technical and process solutions for execution and product implementation

Kiewit OGC Engineering

Houston, TX

Senior Project Engineer

July 2019 – September 2020

- Earned Certificate of Appreciation from Kiewit OGC Engineering for the month of December 2019 as Employee of the Month in the project with 300+ team members for my performance and dedication to the project delivery
- Tracked the deliverables schedule, procurement, and construction with a team of 60+ by coordinating among different disciplines to identify potential project loopholes and advice design proactive strategies to avoid costly delays
- Accountable for the compliance with budget, schedule, and scope of the projects
- Evaluated budget and cost of the project monthly, presenting improvements for utility ratio of the resources and forecasting appropriate personnel requirement monthly for successful completion of Project.
- Piloted multi-discipline communication with project planners to track and link multiple activities, streamlining workflow and completing critical project milestones on time leading to an 85-90% of on-time delivery across many projects' activities

Essar Oil

Stanlow, UK

Engineer Project Manager

September 2018 – July 2019

- Steered multiple Engineering projects in the Program for global customers like Unilever & Essar Oil by tracking project schedule, quality, and cost to deliver optimized economical options to customer.
- Clarified RFI's and technical bids and attended design reviews and kickoff meetings with clients and contractors

Mark West Energy Exterran

Tulsa, OK

Project Manager

April 2018 – September 2018

- Developed project strategy and approach to achieve project objectives
- Responsible for the compliance with budget, schedule, and scope of the projects
