

Snorlax a work of crochet by Liz Valdez.

You come home from school, throw your bag on the floor, sit on the couch and turn on the tv, and what do you hear? "I want to be, the very best, like no one ever was."

Just then, a silhouette of a big Pokémon pops onto the screen, and who's that Pokémon!?

Snorlax! Now, in crochet form, is the sleepy monster that captivated our hearts ages ago.

Snorlax is one of my first creations, unlike the actual Pokémon, Snorlax in crocheted form weighs roughly at about ½ lb and is 10 inches in height.
