Lapras

You come home from school, throw your bag on the floor, sit on the couch and turn on the tv, and what do you hear? "I want to be, the very best, like no one ever was."

Just then, a blue Pokémon pops onto the screen, and who's that Pokémon!? LAPRAS! Now, in crochet form, is the blue monster that captivated our hearts ages ago.

Lapras is my biggest creation to date, weighing roughly at about 2lbs and over 12 inches in height.
