TEXAS A&M UNIVERSITY
CORPUS CHRISTI

AMERICA'S #1 COLLEGE BY THE SEA

GRADUATE PROGRAMS

MAKE AN IMPACT

A graduate degree is an investment in your future that sets you on a path to success. Individuals with advanced degrees receive promotions more quickly and can earn \$1 million more over their lifetimes than their colleagues without advanced degrees.

With more than 50 graduate programs and certificates in diverse fields, including programs like marine science, art, nursing, and education, our community of scholars prides itself on small classes taught by faculty connected in their fields and invested in student success. We offer graduate programs online and in-person to meet your needs.

Our campus rests on its own island at the heart of the Texas Gulf Coast. We offer coastal living and learning with abundant sunshine, palm trees, and gulf breezes. Surrounded by the Oso and Corpus Christi Bays, we are minutes from both the picturesque beaches of Padre Island and bustling downtown Corpus Christi. If you enjoy year-round sunshine, surfing, kayaking, and fishing, the Island University will be your own paradise.

GROW RESOURCES

As part of the College of Graduate Studies, the Graduate Resource and Opportunity Workspace (GROW) offers graduate students an exclusive space and variety of resources tailored specifically to their academic needs and professional development. GROW provides professional workshops, student support events, networking activities, and community service opportunities. Events include resume building workshops, dissertation/thesis workshops, and professional headshot photography sessions.

CASA WRITING CENTER

The Center for Academic Student Achievement (CASA) Writing Center assists students, online and on campus, by providing consistent, knowledgeable, and flexible support. Graduate students may receive up to three weekly one-hour sessions at the Writing Center and can request weekly standing appointments for an entire semester. These sessions are intended to provide ongoing, in-depth assistance to students working on extended writing projects.

I-CREATE LAB & MAKERSPACE

TAMU-CC thrives as a vibrant, diverse community of scholars, artists, and learners, united by a passion for academic excellence and creative expression. A powerful catalyst for this spirit of innovation is the I-Create Lab & Makerspace, nestled within the Mary & Jeff Bell Library.

Here, an array of cutting-edge tools await the campus community, including 3D printers, virtual reality gear, embroidery machines, and beyond. This dynamic space empowers students to bring their visions to life, be it through design, construction, or invention. The possibilities are limited only by one's imagination.
