

BCSSE 2016-NSSE 2017 Combined Report

Texas A&M University - Corpus Christi

The BCSSE 2016-NSSE 2017 Combined Report provides a useful summary of the detailed information contained in your students' BCSSE and NSSE responses. This report contains a summary of administration details, cross-sectional results, longitudinal results, and participating institutions.

Report Sections

Administration Details (p. 3)	Provides important information regarding the population and respondent counts, as well as respondent characteristics.
Cross-sectional Results (p. 4)	Based on all first-year student respondents from your institution's BCSSE 2016 and NSSE 2017 administrations (in contrast to the longitudinal results which contain only matched data). These data provide the best estimates of your students' pre-college characteristics and their engagement during the first year. By presenting your BCSSE-NSSE cross-sectional results side-by-side, you can identify areas of correspondence and gaps in engagement for better understanding of the first-year student experience.
Longitudinal Results (p. 7)	Compares BCSSE 2016 and NSSE 2017 results for students who completed both surveys, making it possible to examine the first-year experience by mapping BCSSE Scales against their corresponding NSSE Engagement Indicators (EIs), and analyzing how well students – toward the end of the first year in college – have met, exceeded, or fallen behind the benchmarks they set from high school.
Participating Institutions (p. 8)	Includes a complete list of institutions by Basic Carnegie type that were included in this report.

BCSSE Scales and NSSE Engagement Indicators

Six of the ten NSSE Engagement Indicators (EIs) have similar content on the BCSSE survey, and are included in the longitudinal section (see box at right). The BCSSE Scales and corresponding NSSE EIs provide valuable information about distinct aspects of student engagement by summarizing students' responses to sets of related survey questions. Each BCSSE Scale is a combination of three to seven items.

The BCSSE Scales are constructed using the same approach as the NSSE EIs. Each scale is scored on a range from 0 to 60. First, component items are converted to a 60-point scale (e.g., Never=0, Sometimes=20, Often=40, and Very often=60), and then averaged to create student-level scores. Your institutional scores are the averages of your students' scores. Student-level scores for both the BCSSE Scales and NSSE EIs are included in your BCSSE-NSSE data file.

For more information about BCSSE, visit: bcse.indiana.edu

For more information about the NSSE EIs, see your *Engagement Indicators* report or visit: nsse.indiana.edu/html/engagement_indicators.cfm

BCSSE Scales and NSSE Engagement Indicators in the Longitudinal Results

- Learning Strategies
- Quantitative Reasoning
- Collaborative Learning
- Discussions with Diverse Others
- Student-Faculty Interaction
- Supportive Environment

This section provides important information about the population, sample, and number of first-year respondents for both BCSSE and NSSE. It also includes respondent characteristics for the cross-sectional and longitudinal results that follow. This information can be useful for assessing data quality and planning future BCSSE administrations.

BCSSE 2016-NSSE 2017 Population and Respondents

	Count
BCSSE 2016 respondents (cross-sectional data)	1,537
First-year students included in NSSE 2017 population file ^a	2,334
BCSSE 2016 respondents identified in the NSSE 2017 population file ^a	1,305
BCSSE 2016 respondents invited to participate in NSSE 2017 ^b	1,302
NSSE 2017 first-year respondents	240
BCSSE 2016-NSSE 2017 matched respondents (longitudinal data) ^a	148

Respondent Characteristics

	Cross-sectional (%)		Longitudinal (%)
	BCSSE ^c	NSSE ^d	BCSSE-NSSE ^e
Gender			
Man	41	40	28
Woman	58	55	70
Another gender identity	0	3	1
Prefer not to respond	1	2	1
Race/ethnicity (Select all that apply.)			
American Indian or Alaska Native	0	0	0
Asian	3	9	7
Black or African American	7	5	2
Hispanic or Latino	35	33	35
Native Hawaiian or Other Pacific Islander	0	1	0
White	36	35	40
Other	1	0	0
Multiracial	16	17	16
I prefer not to respond	1	2	1
Enrollment status			
Full-time	98	91	98
Less than full-time	2	9	2

a. BCSSE respondents identified later in your NSSE population file who are not first-year students are excluded from this report.

b. Adjusted for students identified as ineligible, survey invitations returned as undeliverable, or because a census administration was not conducted.

c. Student-reported characteristics for all BCSSE 2016 respondents.

d. Institution-reported enrollment status, and student-reported gender and race/ethnicity for all NSSE 2017 respondents.

e. Student-reported characteristics for matched students who completed both BCSSE 2016 and NSSE 2017.

It is instructive to compare BCSSE and NSSE results for students who completed both surveys. The displays on this page contrast your students' BCSSE Scale results with the corresponding NSSE Engagement Indicators. For each measure, your students are classified as low, medium, or high relative to all BCSSE and NSSE respondents (divided into thirds). The figures and tables below map your students' precollege standing to their standing in the spring of the first college year. A favorable result, summarized in blue, occurs when students engage in college at a level that is either higher than precollege levels (e.g., from low to medium or high) or consistent with a high precollege level. Unfavorable results, summarized in red, are the opposite (e.g., high to medium or low). The desired result is that your students will engage at a relative level that either exceeds their precollege level or that sustains an already high level.

Key: ■ Unfavorable results ■ Favorable results
