## REPORT SUMMARY

Texas A&M University-Corpus Christi students who applied for graduation for the 2020-2021 academic year were invited to participate in a Graduating Student Survey to offer input about their experiences at the University. Participation in the questionnaire was voluntary and confidential. Both undergraduate and graduate students with valid email addresses who applied for graduation by the posted deadlines for the three semesters of the academic year (fall, spring, and summer) were invited to participate.

### Graduate Students

Starting in 2016, the *Graduating Student Survey* included questions to be answered only by students receiving a Ph.D. or Master's degree. The responses from those students begin on p. 86. Graduate students were asked: if they worked on campus; if they felt prepared to practice at a higher level; about their online learning experience; and the amount of support from the department, college, and university.

### Educational Outcomes

Since the mid-1970s, Higher Education literature has been replete with the importance of social and academic integration into the college community (Astin, 1993; Tinto, 1975, 1993). Simply stated, the more students are academically and socially integrated into college life, the more likely they are to persist and graduate. Thirty-three percent of the respondents indicated that they participated in the First-Year Islander learning communities. Ninety percent of those who participated enjoyed the experience, found it helped develop a sense of belonging here, and how to use campus resources. Sixty-one percent of graduates who participated in the learning community are still in contact with professors or peers from the group. These numbers, along with myriad comments praising the experience, indicate the program is highly successful.

Over 84% of the respondents were satisfied with academic advising and 87% were satisfied with the quality of the core curriculum. Ninety percent of the respondents were satisfied with their overall education at Texas A&M University-Corpus Christi. The lowest satisfaction score in this section was with students' financial investment in their education, 70%.

### Likelihood of Attending Again/Recommending A&M-Corpus Christi

Both items exceeded the recommended 91% combined rating for the likelihood of attending A&M-Corpus Christi again if starting over (87%) and recommending A&M-Corpus Christi to a prospective student (76%). Additionally, 85% would recommend their major and 84% would recommend their program.

### Registration

Twenty-one percent of the respondents indicated that courses in their major were always or often closed when they went to register. Only 11% found courses not in their major were always or often closed when they went to register.

### Academic Major Experiences

All items related to satisfaction with major exceeded the recommended 75% combined satisfaction rating.

The items receiving the **highest** ratings of satisfaction with major are as follows:

- The academic challenge of coursework in your major (91%).
- The preparation of faculty in your major for their courses (88%).
- The interest of faculty in your major in the welfare of students (92%).
- The fairness of the grading practices in your major (93%).
- The feedback from faculty in your major on your academic progress (88%).
- The availability of your faculty advisor (88%).
- The quality of instruction in your major (86%).

The items receiving the **lowest** ratings of satisfaction with major are as follows:

- The frequency that required courses are offered in your major (81%).
- The variety of advanced course offerings in your major (81%).

## **Career Services**

Over 75% of students who used career services scored most of their offerings, such as Job Postings, Career Counseling, Internships, etc. as helpful. The most valuable help from Career Services was with Resume Review (83% found helpful), and Mock Interviews (75% found helpful). The lowest satisfaction score was with the Special Events (Business Etiquette Dinner, Get the Job, etc.) 43%, but that is not a bad score. For the most part, students are very satisfied with Career Services.

## **Employment Information**

- 32% of respondents already found a job for after graduation, 39% are actively looking.
- 76% of respondents report that they will most likely work full time after graduation.
- 41% of respondents report their job is in the Coastal Bend region.
- 71% of respondents indicated that their job after graduation is directly related to their major.
- 23% of respondents report that their job after graduation is somewhat related to their major.
- The highest number of graduates, 15.9%, will be earning a salary of \$50,000 - \$59,000 a year.
- The next highest number of graduates, 19%, will be earning a year\$40,000-\$49,000 a year.

## **Future Educational Plans**

- 18% of respondents report that they have applied for graduate school.
- 40% intend to apply to a graduate school.
- 41% indicated that they do not plan to apply to graduate school.
- 15% of respondents report that they will most likely attend graduate or professional school full-time after graduation.

## **Response Rate**

A total of 1659 survey invitations went out to students who had applied for graduation by the deadline. Thirty-six people only answered the question that asked what degree they would be receiving. Their responses were not included. There were 465 respondents who answered at least two questions that equates to over **100%** of the sampled graduating student population for the 2019-2020 academic year.

## **Methodology**

The Dillman method, which employs multiple contacts with the potential respondents, in this case via email, was used each semester to contact the students who had applied for graduation. An initial invitation was sent with four subsequent reminders to those who had not yet answered. Contacts were made through the students' University e-mail addresses.

## **Reporting**

For navigational ease, key findings are grouped into separate categories by theme/construct. College/Division units should strive to obtain an overall positive combined rating of 75% for each item assessed. To determine the overall positive combined rating for each item assessed, the Office of Planning and Institutional Research recommends combining the percentage scores received for "Very Satisfied"/"Satisfied" Likert-type scale options, as these responses indicate a positive response conveyed by the student assessing the item.

# Results

**Please Note ~**

**About the frequency responses:**

Respondents did not necessarily answer all questions on the survey. Therefore, the totals may or may not match on any particular question.

**About percentages:**

Valid percent means the percentage based on the number of people who answered the question, not the percentage of all the people who answered any question. Percentages are rounded to the nearest whole number, except when less than 1% in which case the exact percentage is reported.

## Career Services

The responses to the questions about career services were not straightforward. Even though the students were asked to first check yes or no if they used the item and second indicate how helpful it was, many students marked only one or the other. Because of this, the total number of people who indicated they used the assistance does not match the total number of responses for the degree of helpfulness.

*The survey instrument begins on the next page.*

*A note about the survey instrument – the information in the blue boxes are directions for Qualtrics. Usually, it is to show a particular question only to students who answered a previous question in a certain way. For example, if you answered that you were in the College of Business, only the options for Departments and Majors in that college appear to you. You do not see all the options for all the colleges.*
