CLASSROOM TECHNOLOGY SUPPORT SERVICES

(Revised: August 21, 2025)

TAMUCC provides purchase, rental, and equipment service and support for faculty classroom use.

Most general purpose classrooms have been configured with a standard set of technology to ensure a consistent experience. These classrooms are equipped with either a projector or display, a Windows computer with a built-in DVD drive, and a document camera. Specialty equipment is available upon request to support special needs. Mobile streaming options are available for rooms that are not currently equipped with a camera and microphone. Contact the IT Service Desk (ext. 2692) for training on classroom equipment or to dispatch assistance.
